

Alterum is **hiring** to accelerate **global energy transition**

Taking actions to fight climate change has never been so important and 2022 marks the launch of our unique software solution to prepare **automated decarbonization plans**.

Alterum has a **clear purpose** that guides its action each day:

Accelerate energy transition by
simplifying decision-making

And while working for solutions to climate change, **Alterum** offers you

A Competitive salary, a work-family balance that adapts to your needs.

A young, dynamic work environment at the heart of the plateau

We're looking for a Full-Stack developer

Here's a taste of what you'll be doing

- Leading the design and implementation of new features
- Continue the building of our software UIs and ensure simplicity and consistency
- Help maintain and develop our cloud and technology stack as we scale
- Being both a creative/product and technical contributor, taking on leadership roles as we grow

Tech stack

- Frontend: Angular
- Backend: Loopback, MongoDB, Python
- Cloud computing : Kubernetes, Google Cloud

Required Skills

- 5+ years of practical experience and proficiency with a programming language
- Experience in cloud computing using Kubernetes
- Experience managing a commercial software and the delivery process of this software to customers
- Ability to prototype, ask for feedback, and iterate quickly
- Strong design, product and user experience intuition

Bonus Points

- Experience with Angular
- Body of work that you'd be proud to show us during an interview, preferably one that's reached real users
